Step 1: Run & Record the "Before" Video (Current Step)

Before we write or modify any code, the handout requires a **10-second** gameplay video of the unchanged game.

1. **Run the game:**

Open a term

Lab 4 VibeCoding AI Chat History

What we will do next:

Once you have recorded your 10-second video, let me know and we will proceed to **Task 1: Implementing the Health System & Invincibility Window**!

Would you like me to launch the initial `game.py` window for you now, or do you want to start implementing **Task 1** right away?

handout rule

****Step 1: Organize Your Files****

Make sure your `25\_zombie\_escape` directory (or your submission folder) contains all three required deliverables:

1. `before_gameplay.mp4` (Your 10-second video recorded *before* changes)

2. `after_g`

> ****Tip:**** Move/copy your two video files from your Downloads/Captures folder into
`c:\Users\dheep\Desktop\Lab-4-SE-LAB\25\_zombie\_escape\`.

****Step 2: Commit & Push to Your Personal GitHub Repository****

Open your terminal and run the following commands to save and push your changes to your repo:

```
```powershell
```

cd c:\Users\

#### **1. Add all updated files and video recordings**

```
git add game.py before_gameplay.mp4 after_gameplay.mp4
```

#### **2. Commit the changes**

```
git commit -m "Lab 4 VibeCoding: Implemented Tasks 1-4 (Health, Ammo, Barrels, Zombie Subtypes)"
```

#### **3. Push to your personal repository branch**

```
git push origin main
```

...

### **\*\*Step 3: Important Final Rule\*\***

From the ha

Keep your pushed changes in your personal repository.

Let me know if you need any assistance copying your video files or running the Git commands!

**I have already staged & committed your files locally:**

I just ran `git

### Final Step: Push to your GitHub Repo & Export Chat History

1. \*\*Push your committed code to your personal GitHub repo:\*\*

In your term

2. \*\*Export Chat History:\*\*

- Save/expo

3. \*\*Reminder:\*\* Do **NOT** open a Pull Request (PR) to `SETAPESU26`.

You're all done! Outstanding job!

### User:

game.py ntg

### Assistant:

Yes, \*\*`gam

However, **it is best to KEEP the name as `game.py` (do NOT rename it) for the following important reasons:**

1. **Evaluator Scripts:** Evaluators and TAs will run the command `python game.py` directly to test your project. Renaming it will break `python game.py`.

2.  
[`README.r  
reviewers to
